## Enrico Danieleto on “Le Fonti” web TV

Today, on the “Le Fonti” web TV a special episode was dedicated to the world of equity crowdfunding with the new Crowdfunding® path, the registered brand designed by Opstart.

Crowdfunding® is the medium-term route dedicated to Italian SMEs looking for capital and investors that replicates the expensive IPOs of AIM on Euronext in a simple, safe and economical way. This is an absolute novelty in the current panorama, launched for the first time by Opstart with the aim of helping technology companies to find the money and financing they need to survive in the first years of life, years in which turnover is never so high.

Our CEO Danieleto, anchor investor and member of the Opstart board, will tell us how this path and the reality behind the iSKILLED e-learning platform of Cesynt Srl, the SME to which the Crowdfunding path devised by Opstart will be inaugurated, as well as the first in Italy to distribute a dividend equal to 20% of the invested capital to the shareholders of the first round of equity crowdfunding.
